

Business Regulations

At the end of this course, students will be able to:

1. Identify and describe the various sources of business law including legislation, judicial decisions, and administrative regulations.
2. Classify the different types of business law such as contract law, intellectual property law, competition law, consumer protection law, and environmental law.
3. Analyze and discuss the classification of contracts including unilateral contracts, bilateral contracts, and void contracts.
4. Evaluate situations involving breach of contract and determine the legal remedies available to parties.
5. Interpret the legal aspects of a contract of sale and understand the rights and duties of the buyer and seller.
6. Explain the concept of intellectual property rights and distinguish between patents, copyrights, trademarks, and trade secrets.
7. Evaluate the importance of Intellectual Property Rights in protecting innovations and creativity.
8. Discuss the key provisions of the Information Technology Act 2000 and its implications on cyber space.
9. Describe digital signatures, private keys, public keys, encryption, and digital signature certificates in the context of electronic transactions.
10. Analyze the role and functions of Competition Appellate Tribunal in resolving competition-related disputes.
11. Evaluate the process of addressing consumer disputes including identifying defects and deficiencies in products and services.
12. Interpret the key provisions of the Environment Protection Act 1986 and its impact on regulating hazardous substances and obligations of occupiers in protecting the environment.
